Daniel Wile

Full Stack Developer in Charlotte, North Carolina

EXPERIENCE

Care Lumen — *Application Development Engineer II*
August 2025 – Present

Centene Corporation — *Application Development Engineer II*
October 2021 – August 2025

- Developed a Kafka consumer using node-rdkafka to maintain accurate records of offline/online activity, restructuring event handling logic to extract more actionable user insights.
- Expanded a Golang-based Role-Based Access Control (RBAC) system to support role and entitlement models, reducing onboarding complexity across the org.
- Integrated the RBAC service with SailPoint, enabling enterprise-wide identity and access management capabilities.
- Built and deployed a full-stack appointment scheduling system for healthcare providers using Angular, NestJS, and MongoDB, designed as a Progressive Web App to support offline mode and background queuing.
- Created CI/CD pipelines using GitLab, Docker, and Nginx for automated testing and deployment.
- Collaborated closely with cross-functional teams, including product, QA, infrastructure, and design, to deliver scalable solutions in an Agile environment.

Wiley Edge — *Full Stack Development Training*
August 2021 – October 2021

- Developed full stack applications utilizing React, Mongo, REST API, Node, Express.
- Learned key software development concepts including data structures and algorithms for designing efficient applications.

Forbo Siegling LLC — *Product Development Engineer*
May 2018 – August 2021

- Utilized Python for data analytics from I/O devices to find new process improvement opportunities.
- Managed multidisciplinary projects to meet key deadlines and champion new product development that created cost savings.

EDUCATION

East Carolina University — *M.S. Computer Science*
August 2021 – December 2025

Key Coursework: Cloud Computing, Data Structures and Algorithms, Android Application Development, Big Data Analytics, Machine Learning

Clemson University — *B.S. Chemical Engineering*
August 2014 – May 2018

Key Coursework: Differential Equations, Statistical Analysis, Thermodynamics

SKILLS

TypeScript – Angular, NestJS

JavaScript – React, Express, node-rdkafka

Python – NumPy, Pandas

GoLang – Back End Development

Database – MongoDB, SQLite, NoSQL

Responsive Design – HTML, CSS, SCSS

CI/CD – Pipeline construction, Docker, End to End Test Development

Other – Git, Agile, Scrum, Kanban, REST API, GraphQL, Kafka

PROJECTS

Healthcare Scheduler App
Developed a scheduler application from scratch for healthcare providers to plan and schedule their upcoming appointments.
Angular, NestJS, MongoDB, Docker

RBAC Management App
Developed full stack for an internal corporation-wide Role Based Access Management application including a full redesign of security, bulk request management, and ease of access for key stakeholders.
Angular, GoLang, MongoDB, Docker

Messageboard Application
Developed a full stack message board application with secure sign on and password management, multi-user interaction including post, comment, and voting capabilities.
React, Express, MongoDB, GraphQL
